

Concrete Cube Test Register

A concrete cube register linking pour locations, batch tickets, sample identities, curing and laboratory references, reported results and engineer review.

1. Record details and scope

Project

Filled in from the project in SiteSurvey.

Site or premises address

Client or organisation

Record date *

Person completing the record *

This is a sample and result register. It does not provide sampling instructions, calculate concrete acceptance or replace a laboratory report or structural engineer's decision.

UKAS accreditation assesses a laboratory's competence for activities within its published scope. Check the laboratory's relevant scope and use its issued test report. A site register links evidence but is not an accredited laboratory result.

2. Pour and requirements

Pour ID and location *

Concrete specification and inspection-plan reference *

Supplier, mix designation and delivery ticket

Sampling plan, method and responsible person

3. Samples

Cube sample (copy this block for each one)

Unique cube or sample ID *

Batch or ticket and sampled location *

Sampling and making date and time *

Curing and storage record reference

Laboratory handover date and receipt reference

Specified test age

Laboratory and relevant accreditation scope reference

4. Reported results

Laboratory result (copy this block for each one)

Sample ID *

Issued report number and revision *

Reported test date

Reported result and unit without alteration *

Laboratory qualifications or exceptions

Engineer review and acceptance reference

Open queries, retest requests or non-conformance references

Link the result to its sample, pour and specified requirement. Record the authorised technical review rather than making an unsupported acceptance decision.
