

Safety walk visual inspection

Walk the same route through the work area, stop where something needs attention or is working well, and leave with named actions instead of a page of ticks.

REPORT REFERENCE

DEMO-SAFETYWALK-001

EXAMPLE SITE

Illustrative distribution warehouse / four separate scenes

VISIT STAGE

Illustrative monthly manager safety walk

DATE

17 October 2026

FICTIONAL SAMPLE

The footage was generated in Google Flow. The observations and organisation are scripted examples, not a real inspection.

About this inspection

Name the area, the date, who is walking and what the walk is focusing on. Follow a set route at walking pace, film anything that needs attention in its location, and talk to the people doing the work about how the job really runs. Record positive observations as well as concerns, and agree an owner and date for each action before you leave. The four AI-generated clips illustrate separate points on one route, not a real site visit.

1. Site and visit details

Report reference	DEMO-SAFETYWALK-001
Site or asset	Illustrative distribution warehouse / four separate scenes
Visit stage	Illustrative monthly manager safety walk
Visit date	17 October 2026
Organisation	Example Distribution Ltd (fictional)
Inspector	Demo operations manager (fictional)
Evidence	Four portrait clips; three still frames per point

VISIBLE RECORD

Four AI-generated clips illustrate a walk route: the aisle entrance, a pallet on the walkway line, a clear fire exit with an extinguisher, and a gated stair that was not entered. They do not document one real site.

SCOPE LIMIT

A safety walk is a leadership and monitoring activity. It does not replace risk assessments, statutory inspections and examinations, equipment servicing or a formal audit, and a clip cannot show that a control works or that a hazard is absent elsewhere.

Visual evidence from the four clips

The stills below are taken from the same Flow clips shown on the landing page.

01 Area and walk route

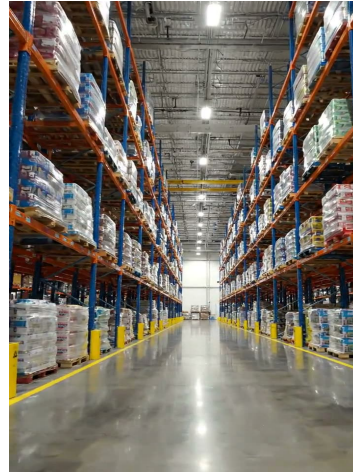

WALK CAM · RECORDED EXAMPLE · 8-SECOND CLIP

01s

04s

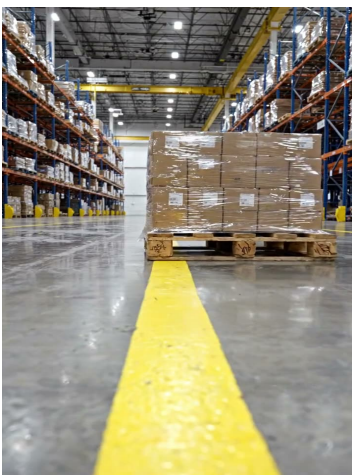

07s

SCRIPTED OBSERVATION

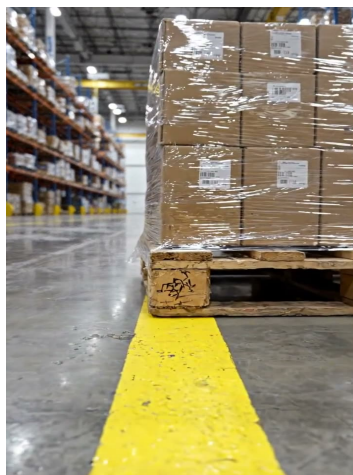

A racked warehouse aisle with yellow floor lines is shown from its entrance.

02 Walkways and housekeeping

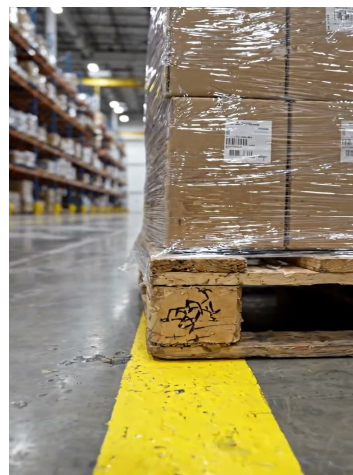

WALK CAM · RECORDED EXAMPLE · 8-SECOND CLIP

01s

04s

07s

SCRIPTED OBSERVATION

A loaded pallet is visible standing on the yellow walkway line in the example.

Visual evidence from the four clips

The stills below are taken from the same Flow clips shown on the landing page.

03 Fire exit and emergency equipment

WALK CAM · RECORDED EXAMPLE · 8-SECOND CLIP

01s

04s

07s

SCRIPTED OBSERVATION

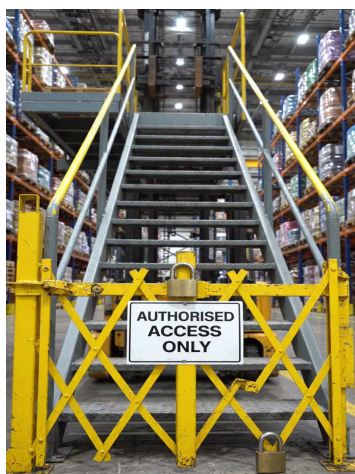

A fire exit sign, push-bar door and wall-mounted extinguisher are visible with a clear approach.

04 Areas not walked

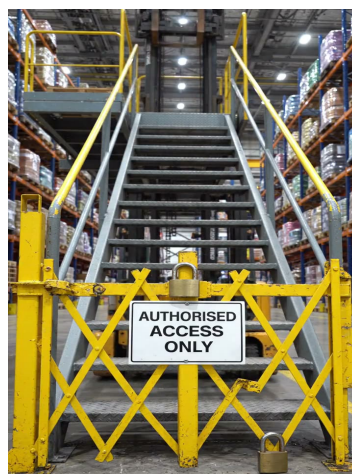

WALK CAM · RECORDED EXAMPLE · 8-SECOND CLIP

01s

04s

07s

SCRIPTED OBSERVATION

A locked gate with an authorised access only sign closes the mezzanine stair, which was not climbed.

2. Point-by-point follow-up

01 Area and walk route

Record the real area name, date and who joined the walk.

02 Walkways and housekeeping

Agree who clears it and when, then check it on the next walk.

03 Fire exit and emergency equipment

Note it as a positive observation; servicing and fire checks stay on their own records.

04 Areas not walked

Name the area in the record and ask the right person to check it if needed.

OVERALL NEXT ACTION

Clear the walkway obstruction the same shift, recheck it on the next walk, and ask the area supervisor to confirm the gated stair is checked under its own arrangements.

NOT EVIDENCED

Extinguisher servicing, fire door operation, racking condition, the areas beyond the gated stair, how often the walkway is obstructed and what workers said away from the camera were not established.

This example describes what appears in fictional footage. Actual findings, actions and sign-off must be made by the people responsible for the real asset or premises.

3. Example terms

SCOPE OF EXAMPLE

This fictional record is not a risk assessment, audit, statutory inspection or confirmation that the workplace is safe. Actions stay with the named owners under the site's own procedures.

Retain original clips, timestamps and comments under the organisation's actual privacy and retention policy. An acknowledgement of this visual record is not automatic acceptance of condition or a waiver of rights.

4. Sources used for scope notes

HSE · Leading health and safety at work (INDG417)

Says leadership is more effective when board members are seen on the 'shop floor' and address breaches immediately, that they can make extra shop floor visits to gather information, and that some organisations involve workers in monitoring.

www.hse.gov.uk/pubns/indg417.pdf

HSE · Consulting and involving your workers

Sets out how employers must consult workers on health and safety and the ways to engage them, which is why a safety walk includes talking to the people doing the work.
